## **Position: Software Quality Assurance Engineer Manager**

Comet Solutions, Inc. is seeking a Software Quality Assurance Engineer Manager in Albuquerque, NM. The QA manager will lead quality assurance operations. Will plan, coordinate and direct the design and implementation of testing plans of our core product to ensure high quality implementations from initial requirements to final delivery. Will work with development staff, customers and management to understand and coordinate the testing efforts, which include all aspects of black box testing, including functional, system, regression and acceptance tests. Will coordinate and plan schedule of testing cases, preparing test data, test execution, and reviewing and evaluating test results. The development technologies include C++, XML, Windows, Linux, Python, and Scheme. Will work closely with developers to identify areas and methods to improve testing efficiency, expand coverage, increase product reliability and minimize costs. Will supervise and direct professional and highly trained technical staff engaged in inspection and testing activities to ensure continuous control over software product. Will plan, promote and organize training activities relating to software product quality and reliability. Minimum requirement is an MS in Computer Science or a closely related field. Submit resume to Malcolm Panthaki, Comet Solutions, Inc., 1181 Menaul Blvd. NE, Suite 1, Albuquerque, NM 87112.
